Northwest Area (PL 4)

New fires:	9
New large fires:	0
Uncontained large fires:	8
Type 2 IMTs committed:	4
Fire Use Teams committed:	2

Middle Fork Complex (48 fires), Willamette NF. Washington IMT 2 (Gormley). Lane County, OR. Timber, brush and slash. Moderate fire behavior with creeping, smoldering and isolated torching. Light precipitation occurred over the fire area yesterday.

North Fork Complex (9 fires), Umpqua NF. IMT 2 (Batten). Twenty-six miles northeast of Glide, OR. Timber. Minimal fire behavior with smoldering, backing and short uphill runs. Structures threatened.

Wild Rivers Complex (3 fires), Siskiyou NF. IMT 2 (Suwyn). Seventeen miles southwest of Grants Pass, OR. Timber, brush and grass. Creeping.

Swanson Lake, Northeast District, Washington DNR. Transfer of command from Washington IMT 2 (Reed) back to local unit tomorrow. Four miles southeast of Creston, WA. Timber, grass and brush. Minimal fire behavior. Area closures in effect. Precipitation occurred over the fire area yesterday.

Summit Springs Complex, Sisters Unit, Oregon DOF. Nine miles north of Sisters, OR. Timber and brush. Minimal fire behavior.

Ochoco Fire Use – WFU, Ochoco NF. Transfer of command from FUMT (Reidy) back to local unit today. Ten miles southwest of Dayville, OR. Timber. Creeping and smoldering. Reduction in acreage due to more accurate mapping.

Jack Creek, Okanogan/Wenatchee NF. FUMT (Bonefeld). Confine/contain management strategy. Thirteen miles southwest of Leavenworth, WA. Subalpine fir. No new information.

Lonesome Complex (3 fires), Rogue River NF. Twenty-one miles northeast of Prospect, OR. Timber. Minimal fire behavior with creeping and smoldering.

Harvey Lake, Warm Springs Agency, BIA. Twenty miles west of Madras, OR. Timber. No further information received. Last report unless significant activity occurs.

Clackamas River Complex (30 fires), Mt. Hood NF. Twenty-six miles southeast of Estacada, OR. Timber. No new information.

FREQUENT SPOT FIRES ACROSS THE LINE

There are few watchout situations that state more clearly how much potential your fire has for rapid, uncontrolled growth. Consider the following questions if you are getting spot fires across your line:

- Can you handle increased spotting? List some ways you can keep ahead of spot fires (gridding the green, lookouts, etc.)
- Do you have a plan for long-range spotting? In what fuel type and under what conditions will you likely have long-range spotting? What types of plans can you think of for handling long-range spotting?
- Is help available if necessary? What kinds of resources will you have in place or order to handle spot fires?
- If fire behavior increases, is your position still defensible? Discuss what type of action you might take if a spot fire takes off.
- Do you have more than one safety zone in case one gets cut off? Describe how you might have multiple safety zones.
- Do the primary lookouts have a good view of the situation? Discuss who might be acting as a lookout (e.g., crew member, air resources, etc.) and how you will get good information from that person. (Are you relying on an air attack who is busy with airtankers?)
- Is the primary burning period ending? Talk about how your tactics may vary from finding spot fires early in the day to later into the evening. Review Probability of Ignition (PIG) and what it can tell you about spotting potential.
- To reduce the risk, be ready to retreat. Keep your guard up even if spotting has not occurred for a few hours. Review fires where you have had frequent spot fires and what you learned about controlling them.
